Background / problem context

General objective:

- to curb the negative economic, environmental and social impacts arising from plastic marine litter
- to ensure a single market with high environmental standards and legal certainty for businesses.
- 'Member States are taking national action against single use plastic. France has banned plastic cups and plates, Italy and France are banning plastic cotton buds, the UK wants to ban straws, joined by the Brussels region recently, and other countries like Ireland and Portugal are considering measures. The EU must act now to ensure these diverse actions do not fragment the single market. Businesses need a level playing field, with clarity and legal certainty, and the possibility to develop economies of scale for new markets and alternative materials.' (Impact Assessment, July 2018)

3

What are UK interests?

- parallel legislative processes
- importance for UK manufacturers and exporters
- · impact within UK

Shaping the agenda: Member States and other actors

June 2017

<u>G7 Environment</u>: Novamont, the French and Italian Environment Ministries hosted the event "The International Coalition Stop Plastic Waste- A bioeconomy cultural revolution to save the oceans"

In the context of the G7 Environment, NOVAMONT, in collaboration with the Italian and French Ministries of Environment, organized on June 10th in Bologna the conference "The International Coalition Stop Plastic Waste - A bioeconomy cultural revolution to save the oceans".

The initiative gave an overview of the policies tackling marine littering from plastic waste and the activities of the "Stop Plastic Waste Coalition" launched at Cop22 in Marrakech. The Coalition brings together local and national governments from 12 countries: Italy, France, Morocco, Chile, Monaco, Mauritius, Sweden, Bangladesh, Australia, Senegal, Croatia and the Netherlands.

Commission actors

- Commission Expert Group on Waste
- ENV leads the work on single-use plastics (SUP), MARE on fishing gear
- The Inter Service Steering Group (ISSG) set up by the SG in January 2018 includes:

SJ, GROW, TRADE, ENER, JUST, EMPL, MOVE, SANTE, CNECT, ECFIN, TAXUD, RTD, AGRI, EAC, REGIO, CLIMA, COMP.

9

The Commission develops a proposal (1)

- 15 December 2017, Inception Impact assessment published
- public consultation, Dec. 2017 Feb. 2018 1800+ contributions
- https://ec.europa.eu/info/law/better-regulation/have-your-say/initiatives/1502-Reducing-marine-litter-action-on-single-use-plastics-and-fishing-gear_en

© EIPA 2024 10

The Commission develops a proposal (2)

Technical input from e.g.:

- EC Joint Research Centre's Technical Group on Marine Litter
- Marine Litter Watch developed by the European Environmental Agency
- European Marine Observation and Data Network EMODnet partnership
- external consultants
- interviews with stakeholders from public institutions, NGOs, industry associations and businesses

Impact Assessment - Regulatory Scrutiny Board issued a negative opinion, followed by a second opinion, positive with reservations

EP Committee report

11 October 2018 ENVI adopts report (51-10-3)

Amendment 83

Proposal for a directive Annex I – part B – indent 6 b (new)

Text proposed by the Commission

Amendment

Products made of oxo-degradable plastic

Justification

All these additional market restriction for products are coherent with the current EU legislation in force or political statement from the European Parliament. For e.g. the European Parliament has just called, on Thursday 13 of September 2018, for a complete EU ban on oxo-degradable plastic by 2020, as this type of plastic negatively affects the recycling of conventional plastic and fails to deliver a proven environmental benefit. Furthermore, the proposal to add a ban of some applications of expanded polystyrene (EPS) in the SUP

23

The final text

Restrictions on placing on the market

Member States shall prohibit the placing on the market of the single-use plastic products listed in Part B of the Annex and of products made from oxo-degradable plastic.

26

26

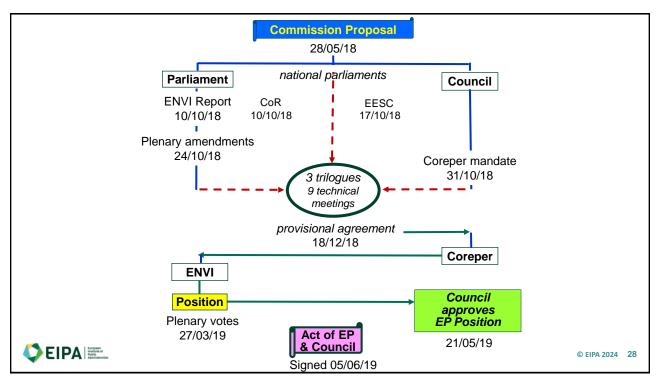

What goes into a compromise package – e.g.....

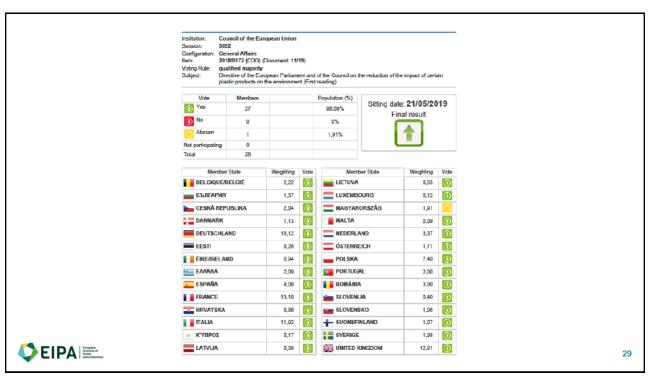

- Consumption reduction: changes were agreed to specify the procedure of inclusion of the measures taken under this Article in existing waste management plans and in particular the timeframe to which these measures will relate to, before the review referred to in Article 15;
- Market restrictions: exemptions were withdrawn on both sides,
- Recycled content: it was agreed to add, in Article 6, a target of 30% recycled plastic to be used as an average in all beverage bottles as from 2030 and, in Article 13, a reporting obligation in relation to the attainment of the targets; furthermore, the transposition deadline for Article 6 as a whole, for all beverage bottles, was set to 5 years from the entry into force of the Directive (Article 17);
- Separate collection of beverage bottles: the Council's two-step approach was accepted, however with the following targets: 77% by 2025 and 90% by 2029;

See Council doc. 5133/19 of 15 January 2019 (OR. en)

27

SUP Directive – Implementing acts

Implementing acts for:

- methodology for the calculation and verification of the annual consumption of single-use plastic products for which consumption reduction objectives have been set
- rules for the calculation and verification of the attainment of the targets on minimum recycled content for single-use plastic beverage bottles
- specifications for the marking to be affixed on certain single-use plastic products
- methodology for the calculation and verification of the collection targets of single-use plastic products for which separate collection targets have been set
- format for the reporting of data and information on the implementation of this Directive.

SUP Directive – Implementing acts EN Official Journal of the European Union 7.2.2022 L 26 COMMISSION IMPLEMENTING DECISION (EU) 2022/162 of 4 February 2022 laying down rules for the application of Directive (EU) 2019/904 of the European Parliament and of the Council as regards the calculation, verification and reporting on the reduction in the consumption of certain single-use plastic products and the measures taken by Member States to achieve such reduction (Text with EEA relevance) THE EUROPEAN COMMISSION, Having regard to the Treaty on the Functioning of the European Union, Having regard to Directive (EU) 2019/904 of the European Parliament and of the Council of 5 June 2019 on the reduction of the impact of certain plastic products on the environment (1), and in particular Article 4(2) and Article 13(4), first subparagraph, thereof, EIPA | European Institute of Public | © EIPA 2024 31

SUP and Northern Ireland

- SUP Directive added to NI Protocol Annex 2 (areas in which Northern Ireland will be required to remain aligned with EU product/technical standards.)
- Only those parts of the Directive that are required to allow a proper functioning of goods movements between Northern Ireland and Ireland/the European Union
 (= Articles 2 to 7, 14 and 17 and Parts A, B, C, D and F of the Annex: consumption reduction measures for cups for beverages and food containers (Article 4), the requirement to restrict the placing on the market of certain single use plastic goods, such as plastic cutlery (Article 5), product specific requirements largely related to plastic beverage bottles, and new labelling requirements on a subset of plastic products.)
- Transposition by 1 January 2022 compared to 1 July 2021 for EU Member States.

34

34

SUP and Scotland

Single Use Plastics: The first exclusion from United Kingdom Internal Market Act (UKIMA) Market Access Principles

- Scottlsh 2019 commitment to 'meet or exceed the standards' of the EU SUP Directive
- Environmental Protection (Single-use Plastic Products) (Scotland) Regulations 2021, 9 November 2021, (into force 1 June 2022).
- discussion with the UK Government and other devolved administrations through the Resources & Waste Common Framework to explore how best to manage policy divergence in this area, including how the Internal Market Act impacts on this.'
- United Kingdom Internal Market Act 2020 (Exclusions from Market Access Principles: Single-Use Plastics) Regulations 2022 came into force on 11 August 2022.

35

"Keeping Pace" between Scotland and the EU

"Keeping Pace"

48. While the UK was a member state of the EU, the Scottish Government was required to comply with EU law in devolved areas. Powers were available to Scottish Ministers through Section 2(2) of the European Communities Act (ECA) to implement EU legislation in domestic law. These powers are no longer available to Scottish Ministers.

49. Scottish Ministers have indicated that, where appropriate, they would like to see Scots Law continue to align with EU law. To support this policy aim Part 1 (section 1(1)) of the UK Withdrawal from the European Union (Continuity) (Scotland) Act 2021 confers a power on Scottish Ministers to allow them to make regulations (secondary legislation) with the effect of continuing to keep Scots law aligned with EU law in some areas of devolved policy (the "keeping pace" power).

https://www.parlamaid-alba.scot/chamber-and-committees/committees/current-and-previous-committees/session-6-constitution-europe-external-affairs-and-culture-committee/quidance-on-uk-internal-market

36

36

Devolved engagement with the EU post-Brexit?

- 62. The Scottish Government set out the ways in which it would seek to work with the EU:
 - · proactive and constructive engagement with the EU institutions and other multilateral organisations
 - · active bilateral collaboration with member states.
 - robust and constructive engagement with the UK Government and the other devolved governments to protect Scotland's
 interests and shape the UK Government's approach to influencing the EU and future international activity.

63. The Scottish Government have stated that relevant policy leads, staff in the Scottish Government Brussels office and legislative monitoring staff contributed to the development of, monitoring and, where necessary, implementation of EU law. While this cannot be entirely replicated outside the EU they have said that this approach, of a collaborative process involving EU-facing staff, could be continued and developed to monitor changes to EU law and, in collaboration with policy teams, develop policy proposals for keeping pace with EU law as appropriate.
